

NEXT GENERATION RISK MANAGEMENT

ROSTERING

SASSI® has an optional “Rostering” module. Contractors who take up this option can roster their staff to work at building on SASSI®.

With Rostering, you can easily prepare a schedule of your employees’ working hours - for a week, fortnight or month ahead.

Rostering is integrated with SASSI® so the actual hours on-site can be recorded against the rostered hours.

The system has rules based around the legislative requirements of awards. It has been designed particularly with cleaning and security awards in mind.

FEATURES

SASSI® Rostering shows:

- the number of ordinary hours to be worked each week
- the days of the week on which work is to be done
- the starting and finishing times of work for each day of the week.

SASSI® Rostering is fully integrated with the SASSI® sign-on and sign-off.

A manager can build a roster with a simple graphical interface based on a calendar.

The system manages hours for students and visa holders.

It can record annual, sick and other leave. Managers can reconcile actual and rostered Hours. SASSI® Rostering can be interfaced with payroll and HR systems.
