

NEXT GENERATION RISK MANAGEMENT

SASSI[®] DOCUMENT REVIEW SYSTEM (SDRS)

SASSI[®] Document Review Service (SDRS) ensures contractors meet legislated WHS compliance criteria. SDRS manages SWMS review licencing and insurance requirements of all workers providing you with a transparent database.

FEATURES

Consultation and Analysis

SASSI[®] communicates with our client's key stakeholders throughout the entire SDRS process. This ensure we gain an understanding of the current internal processes for review, to be able to create a review system that meets each client's specific requirements.

Mobilisation

The SDRS roll-out process focuses on communication and partnership. SDRS will provide material and user manuals to assist in this training to both key stakeholders and contractors who will be signed up to our system.

Compliance Review

The SDRS portal reviews compliance documents according to checklists agreed upon with the client. The document review analyses the validity of worker's documentation. This allows easy maintenance of legislation WHS obligations.

Compliance Renewal

The SDRS platform completes daily checks for any documents that are approaching expiry. Contractors are advised of pending document expiry, allowing ample time to review and update.

Monthly Statistics

SDRS will provide a broad range of monthly statistics showing the status of all contractors who provide services at each of the listed properties.

Web-based database

The service is run online, meaning site documentation can be reviewed by key stakeholders at any time from any location.

Ratings

Each contractor will be given a rating based on the number of successful document reviews against the number of failed reviews.
